

MADANG ITINERARY

During **June** through **September**, GOLDEN DAWN offers Northern Papua New Guinea. Madang departures go to the islands some 70nm east. The coastline and surrounding islands offer some truly great diving. The islands of Bagabag, Crown and Long with their tall volcanic peaks and their superb fringing reefs feature one newly discovered site "Julien's Reef", is on par with "Carl's Ultimate", and is rich with corals and large schools of **barracuda** and **mackerel** and other pelagic species. The number of **hammerhead** sightings on this itinerary has been numerous and tiger sharks have also made appearances. The night anchorage's offer truly classic Milne Bay type muck dives in the rich volcanic sand. Snake eels, inimicus, turtles and cuttlefish are commonly sighted.
